To Whom It May Concern,

The Mohegan Tribe of Indians of Uncasville, CT, proprietors of the Mohegan Sun Casino, continue to partner with EnviroShred, a division of Easter Seals Connecticut. This collaboration exists in order to fulfill our shredding agreement of sensitive documents. Throughout the tenure of this relationship EnviroShred has been able to exhibit the ability to handle the unique intricacies of our sometimes unexpected needs as well as the amount of shredding being picked up in a safe and secure manner. The continuing factors in the process to maintain EnviroShred as a trusted vendor has been based on the positive on-going experience and the three initial factors that attracted us.

The assurance of a secured process in which documents are handled from property to base is of utmost importance and EnviroShred demonstrates that the security of their facility and procedures are second to none. This is continually evident in their adherence to strict certifiable standards worthy of Government institutions and NAID certification.

Cost savings initiatives were also important such as a web application to witness destructions at our location in lieu of traveling to the facility. Spot checks are done and have always been confidently welcomed by EnviroShred under the condition the checks are done randomly.

Being able to staff a workforce who would normally have difficulty finding employment in the open market gives us a unique incentive companywide to send as much secure shredding to EnviroShred as we can in order for them to staff as many people as possible.

We thoroughly enjoy our continued partnership.

Gratefully,

Robert J Ridgway
